

Storage Technology and Special Solutions

Product Catalogue

Leading Through Innovation

The success of our customers depends on a well-functioning holistic concept in which all individual components work together harmoniously. Whoever produces hygiene-sensitive products bears with them a certain responsibility. As a successful, producing enterprise you have to keep many aspects of the requirements and regulations of hygiene and food safety in mind.

We support you in this task and deliver customized hygiene solutions, as well as innovative technology. We develop the perfect fit, specific to your business, complete hygiene-concept and are reliably, along with our expertise, available by your side. In addition to this, after implementing our solution, we continue to be available to you for advice, regular service and for emergencies..

Your PARTNER for HYGIENE and TECHNOLOGY.

Storage Technology

Conveyor rack for manual storage of Euronorm stacking crates according to the first-in first-out principle (FIFO)

Wheeled carpet for storing stacks of containers as ripening stores or for order picking of large quantities

Picking warehouse with transportation of the picked goods to shipping area

Rolled carpet for storage of whole pallets as ripening storage, buffer storage or for order picking of large quantities

Storage Technology

Individual storage locations with automatic loading and unloading as buffer or order picking warehouse. 100 % access to each individual storage location.

Combination of a fully automatic conveyor rack with a manual picking zone for picking small quantities.

Conveyor rack with automatic loading and unloading as buffer or order picking warehouse. Identical articles are stored and retrieved sorted by type in a shaft.

Storage of empty crates of approx. 500 - 5000 pcs is possible in different variants.

Storage Technology

Semi-automatic slaughtering with a circular knife for clean, loss-free cutting of the cuts

Support of belt cleaning by rinsing nozzles in the lower tower as well as lever for lifting the plastic belt

Cutting belt with plastic link chain and parallel arranged work tables

Cutting band with stainless steel band.
A robust and easy to clean version for industrial use.

Special Solutions

Feeding of the products from the de-clipper for insertion into the thermoforming machine.

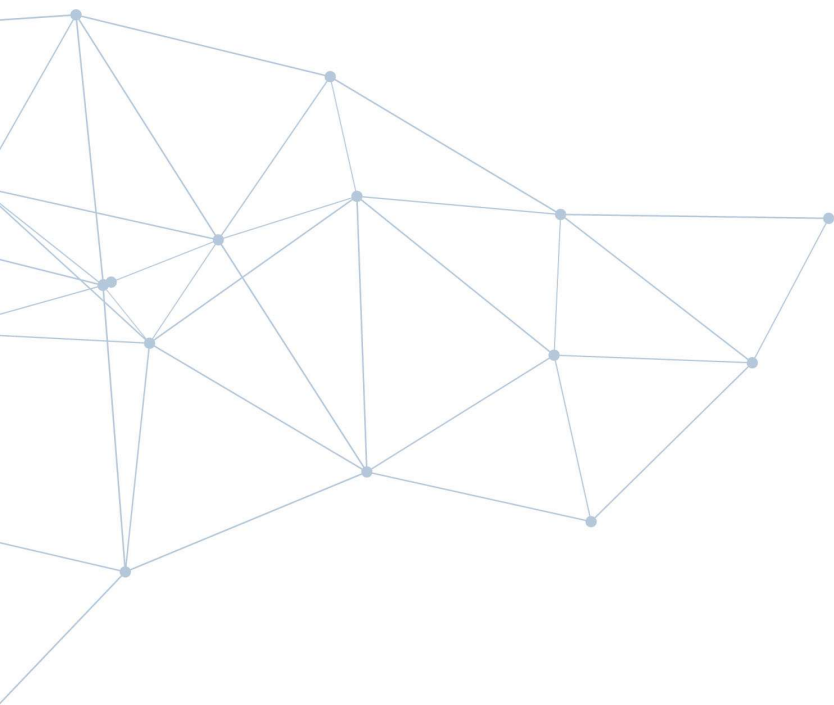

Feeding of the products into the loading area of the thermoforming machine as mobile version.

Sorting belt for vegetables for sorting out impurities by employees standing on the side of the belt or using a strong magnet.

Packaging workplace: The thermoformed and price-labelled goods are bundled and packed in cardboard boxes.
